

NEWS RELEASE

AmiPrint: Modern Printing Is Available

Cardiff, 3rd October 2026

USB and network printing for A600GS, A1200GS and A1200NG

AmigaKit Ltd is pleased to announce the immediate availability of **AmiPrint**, a new printer support system for the A600GS, A1200GS and A1200NG. AmiPrint brings straightforward printing to AmiBench, enabling applications to print directly to a supported local USB printer or to a printer on the user's network.

Installation has been designed to be as simple as possible. Customers purchase a licence online at **AmiPrint.net** and receive a personal serial key automatically after payment. After registering the key with AmiSphere, AmiPrint can be easily downloaded and installed with a single click in the A600GS, A1200GS or A1200NG.

Once installed, AmiPrint provides a central Preferences interface for selecting configured printers and adjusting output options. Local USB printers, network printers and PDF output can all be selected from the same straightforward environment.

Matthew Leaman, Director of AmigaKit Ltd, said:

"Modern direct printing is a feature our users have requested. We are pleased to offer this driver package which pushes our systems forward in the goal of using our favourite platform as a daily driver."

"After releasing AmiBrowser (modern web browser) AmiPDF (a modern PDF viewer), we can now add AmiPrint to the list delivering modern printing support."

Matthew Leaman, Director, AmigaKit Ltd

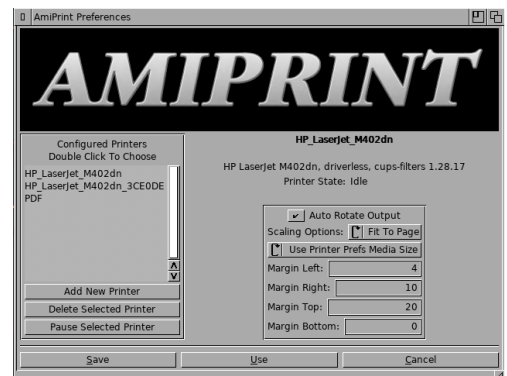

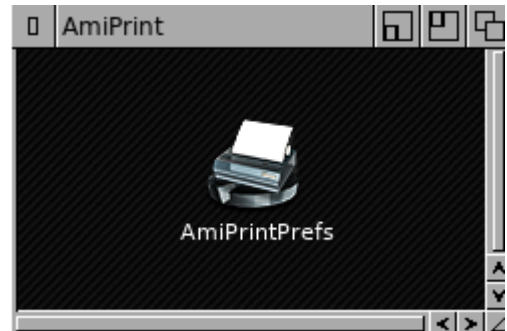

About A600GS, A1200GS and A1200NG

Amiga Kit is committed to developing and releasing computer systems that can play much loved OCS, ECS, AGA, RTG games.

Our systems are the most capable and run Classic applications such as OctaMED 8, Personal Paint, Directory Opus, Final Writer and modern software found on other computer platforms such as an internet browser, PDF viewer and printer driver system. All with lots of memory and in glorious 1080P.
